## **DETAILED ACTION**

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to an inverse emulsion.

Group II, claim(s) 8-14, drawn to a method of making an inverse emulsion.

Group III, claim(s) 15, drawn to a method of using an inverse emulsion.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Yeung discloses polymer emulsions formed by inverse polymerization reactions. The polymer is a reaction product of

- (a) an ethylenically unsaturated carboxylate having between about 3 and about 6 carbon atoms;
- (b) an ethylenically unsaturated monomer which is nonionic in nature;
- (c) an ethylenically unsaturated monomer containing one or more sulfonate or sulfoalkyl groups;
  - (d) an ethylenically unsaturated monomer having surface active properties; and
  - (e) a crosslinking agent is provided.
- (a) can be acrylic acid or methacrylic acid in the amount of 50-90%, (c) can be 2-acrylamido-2-methylpropanesulfonic acid (AMPS) in the amount of 1-20%, and (e) can be methylenebisacrylamide in the amount of 0.01-5.0%.

Yeung does not disclose the use of a cationic acrylic monomer.

Fillipo (US Patent 5,169,540) disclose inverse emulsions comprising cationic monomers commonly copolymerized with acrylamide including acryloyloxyethyltrimethylammonium chloride and methyacryloyloxyethyltrimethylammonium chloride.

It is disclosed the cationic monomers provide stable blends.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MELISSA S. MERCIER whose telephone number is (571)272-9039. The examiner can normally be reached on 8:00am-4:30pm Mon through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward can be reached on (571) 272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
